1. The Tezno auxiliary airfield is located south of Maribor near Betnava, and west of the Tezno freight station, on the spot formerly occupied by a military training field. The airfield was begun in the latter part of 1946 and was completed in 1948.
2. The airfield is 1,800 meters long and 600 meters wide. A large cement floor 800 meters long by 200 meters wide, which is made up of cement plates six meters by two meters, is located in the middle of the field. The remaining surface is of very hard earth.
3. The airfield has a meteorological station and five wooden hangars, each of which holds from three to four planes. On the northern side of the field is a large one-story stone building, 40 meters long by 16 meters wide, and to the east of this building is an underground tank, which reportedly has a capacity of approximately thirty thousand liters of gasoline. The personnel of the airfield are housed in Betnava.
4. The airport is used for sport flying and for glider flying. There are almost always four to six planes from Zagreb or Ljubljana in the hangars.

This document is hereby regraded to
CONFIDENTIAL in accordance with the
letter of 16 October 1978 from the
Director of Central Intelligence to the
Archivist of the United States.
